

5G Omni-Directional Antenna 24 ~ 65GHz **NEW**

► Overview

We are developing series of 5G testing devices and releasing omni-directional antenna. This 5G omni-directional antenna covers up to 65GHz including 28GHz and 39GHz band.

► Feature

Can be used to measure wide band, standard antenna for 5G measuring system.
Durable design and construction.

► Specification

Frequency (GHz)	24 GHz ~ 65 GHz
Impedance	50 Ω
V.S.W.R.	≤2.0
Polarization	Linear polarization
Radiation Pattern	All Horizontal Directions
Dimension	φ 16 x H40 mm (Not including connector)
Connector Type	1.85mmV/J(Standard)

■ Appearance

Product Code : 01S1173-00

■ Typical Data VSWR(Zo=50 Ω)
